Project Title: Mixed Reality Poker
Contact person: Thorsten Altenkirch
Contact email: txa@cs.nott.ac.uk

Team Members

Name	Email
Pedro Santos de Mendonca	psyps4@nottingham.ac.uk
Jonathan Balls	psycjba@nottingham.ac.uk
Samuel Copping	psysrc@nottingham.ac.uk
Weng San Wong	psywsw@nottingham.ac.uk
Holly Tang	psyywt@nottingham.ac.uk
Huachen Zhang	psyhz4@nottingham.ac.uk

Description of Team Skills

Our team has a huge interest in this project for a series of reasons. Not only would we be eager to work on such a project but we also have experience on similar projects, which would allow us to have some prior underlying knowledge. Pedro and Jonny in particular have participated in two hackathons in the last year where they made multiplayer games, using Node.js servers.

On their last hackathon at HackUPC - one of the largest hackathons in Europe - they created a multiscreen multiplayer game which implemented many concepts that could also be applied to this project. They both made it to the finalist teams.

Jonathan currently has an app in the Google Play store which allows the visualization of student timetables (NottsLife) meaning we have experience in app development. We also have team members with access to and experience with Mac platforms for the development of IOS apps.

Our team also has experience in different areas of graphical design and artistic skill such as the usage of the Adobe Creative Suite with experience ranging from Illustrator and Photoshop for simple image creation to After Effects and Flash for the creation of animations.

All members of our team have experience in programming; from the most traditional languages on the Computer Science course to some less orthodox languages such as R, D and CoffeeScript.

Date of Submission of EoI	17 October 2016
Date of Pitch	28 October 2016
Notification of award	1 November 2016
